Profile

I am a proficient developer with a strong background in crafting scalable, secure, and innovative web solutions. My experience includes developing portfolio websites for tax and Hajj & Umrah services, an eCommerce platform, and TripSummit—a Laravel-based travel agency system with integrated payment gateways (PayPal, Stripe). I contributed to an Arab company's exhibition and conference platform, renowned for economic events and the annual International Forum for Arab Tourism and Umrah, featuring a QR code attendance system. I've also built an Online Hotel Booking System with real-time features and honed API development during an internship, emphasizing clean code. I excel at delivering user-focused, high-quality digital solutions.

Professional Experience

2024/06 – 2024/10

2. Backend Developer at Master Vision Integrated Solutions

At Master Vision Integrated Solutions, I worked as a Junior Backend Developer, where I contributed to the development of web applications using Laravel and PHP. My responsibilities included:

- Developing and maintaining backend features and services
- Writing efficient, reusable, and clean code
- Collaborating with frontend developers to integrate APIs and improve overall system functionality
- Assisting in debugging and optimizing the performance of web applications
- Gaining experience with MySQL and other database management tools

This role enhanced my technical skills, teamwork, and ability to deliver high-quality backend solutions in a fast-paced development environment.

2024/03 – 2024/04

1. Internship at SolutionPlus Company

During my internship at SolutionPlus, I received hands-on training in backend development with a focus on various technologies, including PHP and Laravel. I worked on several key projects where I gained experience in:

- Developing and maintaining backend APIs
- Collaborating with the development team to improve code quality and system performance
- Learning best practices for database design and optimization
- Troubleshooting and resolving issues within live applications

This internship provided me with a solid foundation in backend development and allowed me to sharpen my technical skills in a real-world environment.

Skills

PHP	LARAVEL
MYSQL	RESTful APIs
SQL	Git, GitHub
MVC Architecture	HTML5/CSS3
JavaScript	jQuery
Postman	CLI
Eloquent ORM	Filament
livewire	PSR
Data Structures	

Projects

IFT

An Arab company specializing in organizing exhibitions and conferences, renowned for hosting economic and investment events, most notably the annual international forum for arab tourism and umrah. One of the most useful features in this project was the QR code to record the attendance of the exhibitions.

Orkhan

This project involved developing a portfolio website for a tax solutions company, aimed at showcasing their services, providing essential tax-related information, and facilitating user inquiries. The website serves as a professional online presence for the company, offering a user-friendly experience while maintaining a strong focus on security and functionality.

Masr El Gedida and 3 websites like it [Malaz , Alamal, Gar elhabib]

This project involved building a **portfolio website** for a **Hajj & Umrah service provider**, designed to showcase the company's services and provide potential clients with a streamlined way to inquire about packages. The website includes a **contact form** that integrates with a **CRM system** to collect basic user information, making it easier for the client to manage leads and follow up with inquiries.

The primary goal of the website was to provide an informational platform where users can explore available Hajj and Umrah packages, while also enabling the company to track and manage customer interactions directly through the integrated CRM.

Internship project

This project provided me with hands-on experience in developing scalable, secure, and efficient APIs, while also giving me the opportunity to practice best coding practices and clean code principles.

eCommerce

This project involved developing a fully functional **eCommerce platform** that allows users to browse products, add items to a shopping cart, and securely complete their purchases online. The platform was designed to be user-friendly, secure, and scalable, with features that support both customers and the store administrators.

TripSummit - Travel Agency Platform

A comprehensive travel agency platform built with Laravel. It enables users to explore various destinations, each offering multiple travel packages that include detailed tours. The system supports multiple payment methods, including **PayPal**, **Stripe**, and cash. Additionally, TripSummit features a blog for travel articles, an FAQ section, and dedicated pages for team members. The platform is designed to provide a seamless user experience, with an intuitive admin panel for managing destinations, packages, bookings, and payments efficiently.

Online Hotel Booking System [↗](#)

Developed a fully functional hotel booking system using Laravel. Integrated **PayPal** and **Stripe** for secure online payments. Implemented **real-time** cart updates using WebSockets. Added **WhatsApp** notifications via **Twilio** API for booking confirmations. Built an admin dashboard with **Filament** to manage bookings and rooms. Designed a room availability system based on real-time date selection.
